'This doesn't seem like a good idea at all to a policeman.'"The phone case is sold online by various sellers at prices from about \$5 to \$49 and comes in several different colors. 'The case is popular. That's why we sell it. If you have the case, you can play games of shooting at parties, " said the Trend Shop."Don't worry. 43. A zoo is a place where animals are kept and displayed (展示) to the public. Some people argue that a zoo need not be a place for animal display alone, and may also include raising animal species (物种) which are becoming less and less. Animal rights groups are divided on the matter of keeping animals in zoos - with some in favor of this practice, and others calling for a ban (禁令). The most important reason that those in favor of this practice put forward is that it offers protection for animals. For those species which are fighting for their life, zoos are the best places where they get plenty of food, water and medical care when needed. Those who are against the practice argue

---

that the idea of "displaying animals to the public" is itself a strong enough reason for banning. They further add that the practice of using animals for our own selfish gains cannot be a good reason under the excuse of protection. The treatment of animals in these zoos is yet another big worry, with quite a few reports about ill-treatment (虐待) of animals once in a while. It's very difficult to come up with a clear idea on whether it is right to keep animals in zoos or not. It is true that the animals are protected in these places as they don't get into conflict with humans. But, at the same time, one has to admit that keeping them in zoos equals a disrespect for nature. These animals are born to live in the wild, and we should accept this fact.

47. Did your child's brain become smaller last summer? Probably not, according to a study by Dr.

---

Harris Cooper, professor at the University of Missouri-Columbia. The study found that when students return to school after a long summer vacation, they've lost one to three months worth of learning. This is more harmful for math than it is for reading. "All students lose math skills," says Cooper. It may be because kids (小孩) have more chances to practice reading than math. Middle-class children actually learn more in reading than lower-income students over the summer. Cooper feels that this results from the variety of activities that many middle-class kids take part in over the summer, such as camping(野营) and trips. "Parents can help their kids keep educational skills," says Cooper. He suggests the following tips to have a learning-filled summer.

1. Keep lots of books around and make regular trips to the library. Most libraries offer special summer events for kids.
2. Think about what your kids may be learning next year when you plan the family vacation. Talk with teachers to find out what they'll be covering in class.
3. Keep math in mind. Since kids lose more math skills than anything else over the summer, try to do some special planning to find math-related activities.
4. Consider summer school. Struggling kids can get a lot of different kinds of help from summer school programs. Summer school can also enrich and quicken learning in areas where kids show a special interest.

Remember to keep it fun! You don't want to make your kids unhappy with learning during the summer break.

(1) (单) What did Dr. Harris Cooper find in his study? ( )

- A. Kids love reading more after the summer.
- B. Kids show a special interest in math after the summer.

- D. Kids have a lot of fun in the summer.

答案: C
